

Virtual Reality!

What is a virtual school and how the heck does it work?!

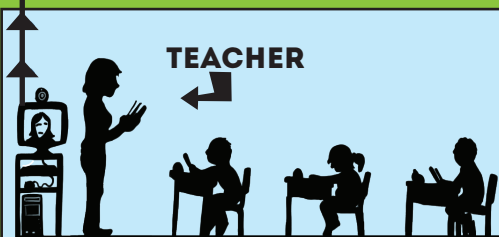

Think of your virtual school as an office of teachers, hovering above your local authority, keeping an eye on education for children in care. In smaller local authorities the virtual school only has a virtual headteacher, but in bigger areas, virtual teachers work there too, helping out the virtual heads.

They call and visit designated teachers in actual schools, making sure everything possible is being done for young people there. Simple!

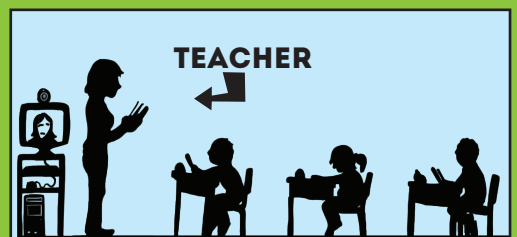

Even if your placement means you move outside your local authority, your virtual school won't change.

SCHOOL

SCHOOL

DESIGNATED TEACHERS are normal teachers who also look out for children in care at the school where they teach.

"Hi virtual teacher!"
